

innovate... laminate

The Matrix Duo is a single sided roll fed laminating system ideal for both laminating and encapsulating.

## Design

The Matrix Duo is an innovative new laminating system designed for laminating and encapsulating. This model is available in 460 and 650mm widths.

## Unique Benefits

Single side laminating is a popular requirement for printers and copy shops wanting to laminate a whole host of printed media from business card to menus. Many customers are more than aware of how expensive this can be if out-sourced. The Matrix Duo allows the flexibility of single side lamination and encapsulation providing an affordable and effective solution. The unique anti-curl bar on both models allows even the thinnest of laminates to be applied without the worry of a curled finish and extension arms allow large rolls of film (up to 1000m) to be used saving changeover time.

## Performance & Build

Both models are built for continuous use on an everyday basis and have been constructed using parts of the highest quality including heavy duty motors and all metal construction.

### IDEALLY SUITED FOR

- menus
- banners
- signage
- posters & prints

and many more...

### GREAT FOR USE IN

- commercial printers
- In-house print rooms
- copy and print shops

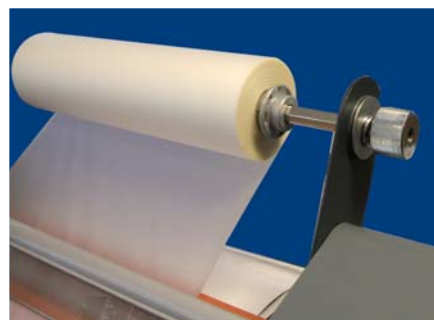

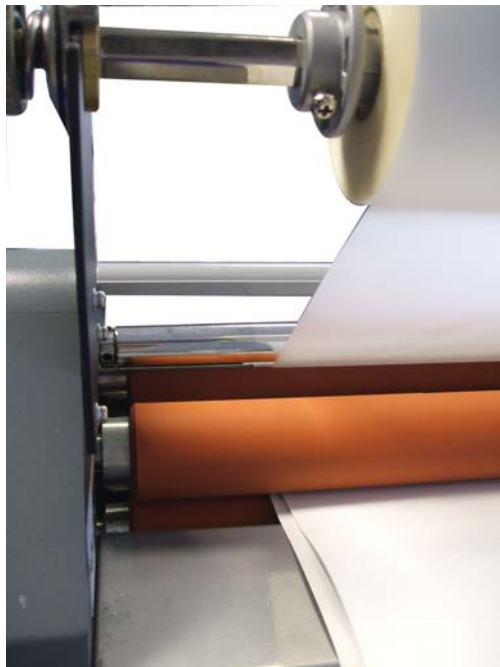

# MATRIX DUO

MD-460/MD-650

## FEATURES

- laminate or encapsulate with ease
  - load up to 1000m in film length
  - anti-curl bar gives perfect flat results
  - available in two sizes SRA2 (455mm) or A1 (635mm)
  - variable speed control
  - solid construction heavy duty system
  - anti-jam reverse mechanism
  - attached safety shield
  - independent heated rollers
- *The Matrix Duo is currently undergoing design improvements and therefore the images shown may vary from the actual system.*

Extension arms
