

# The Mini-Zip

DIGITAL PRINT BUSINESS CARD CUTTER

The Mini-Zip Business Card Cutter is a very simple machine designed to cut ten business cards, of size 55 x 85mm, from an A4 sheet.

*First Cut*

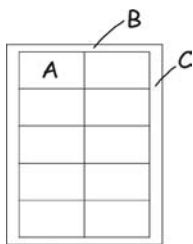

The machine incorporates two fixed independent cutting sections. Once the card design is complete and printed, A4 sheets are stacked in piles of five and fed through the first cutting section.

The blades cut the sheet down the middle and remove the edges to leave two strips of five cards. Each strip measures (85 x 297mm).

These strips are then turned through 90 degrees and passed through the second cutting section.

This removes the edges and cuts the strips into five perfectly cut piles of business cards.

Combined with a laser or ink jet printer, the Mini-Zip allows low volume business cards, ID Cards and tickets to be produced with ease.

### *Print Template Layout*

Sheet Size — A4 (297x210mm)  
Maximum Thickness — 250gsm

Card Size (A) = 85 x 55 mm  
Top Margin (B) = 11 mm  
Side Margin (C) = 20 mm

*Second Cut*

## *Specifications*

Machine Size Closed:	398 x 181 x 191 (h) mm	Max Card Thickness:	250 gsm
Machine Size Open:	398 x 411 x 258 (h) mm	Business Card Size:	85 x 55mm (fixed size)
Machine Weight:	4.8 kgs	Cutting Speed:	100 Cards in 2 minutes
Machine Size Packed:	260 x 510 x 220 (h) mm	Cutter Durability:	500,000 cards
Machine weight Packed:	5.4 kgs	Maximum Feed Stack:	5 cards
Stock Size:	A4	Electrics:	220 Volts AC
